REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The specific limitations of the combination of structural features and sequential method steps of "...a magnetic-responsive drawing tablet having a housing, a writing surface and means for displaying an image responsive to magnetic contact on the writing surface, means for erasing the image, and at least four magnetic stamps appropriately sized relative to the writing surface and shaped as big line, little line, big curve and little curve, the method sequentially comprising...a teacher stamping the writing surface with one of the at least four magnetic stamps aligned with either the upper left-hand corner region of the housing or a central upper region of the housing to form a part letter image...the teacher erasing the part letter image...a student imitating the teacher stamping of step (a)...the teacher stamping the writing surface with one or more of the at least four magnetic stamps to form a complete letter image...the teacher erasing the complete letter image...the student imitating the teacher stamping of step (d)" are not anticipated or made obvious over the prior art of record. For example, Yamazaki '484 discloses a magnetic display apparatus which teaches a housing (2), a writing surface (10), a means for displaying an image responsive to magnetic contact on the writing surface (figure 5A), a means for erasing the image (elements 24a and 24) and the use of magnetic stamps which are appropriately sized relative to the writing surface (col. 3, lines 59-61). Brinkley '883 discloses a magnetic display apparatus (figure 5 and col. 1, lines 33-40) which teaches that it is known to provide a plurality of members used for display in the shape of a big line (10), little line (11), big curve (18), and little curve (19),

among others, for the purpose of teaching the construction and recognition of letters of the alphabet (col. 2, lines 46-48). Larsen '118 also discloses an educational device which utilizes a plurality of members in the shape of a big line, little line, big curve, and little curve for the purpose of teaching children how to form letters and numbers and further teaches covering a source word so that a child may formulate the word from memory (col. 4, lines 29-37). However, prior art of record fails to disclose or teach the combination of the above claimed structural elements in combination with the above sequential method steps.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
